# **Executive Summary**

The objective of the Connect New Mexico Pilot Program ("Pilot Program") as funded by The American Rescue Plan Act's (ARPA) Capital Projects Fund (CPF) is to foster the deployment of broadband access across unserved and underserved areas in New Mexico through sustainable, scalable networks and financially viable business plans and serve the comprehensive community with high-quality, reasonably priced solutions; that is, ensure immediate access to at least 100/20 megabits per second (Mbps) download/upload speeds statewide, which can be scaled to 100/100 Mbps speeds in the future. This is in alignment with the Capital Projects Fund (CPF). The NM Office of Broadband Access and Expansion (OBAE) hosted a Notice of Funding Opportunity (NOFO) for applicants to be awarded funds as subrecipients on the Connect New Mexico Pilot Program Plan using the Capital Projects Fund award. This NOFO had a multiwave application design to allow eligible entities the necessary time to submit applications, address any shortcomings in initial applications, and re-apply. Three waves have been conducted, from which only two have completed the scoring and awarding phases. The third wave is in the scoring process.

The Federal Communications Commission (FCC) Fabric Map Challenge and campaign were completed. Broadband Day at the Legislature, Broadband Month, Connect NM Month, and planning the Spring Sprint and Regional Engagements were major milestones reached, as well as Connect NM Council meetings, working group meetings, a press conference on 1/10/2023, and grant award events. Six regional events and thirty county events have been scheduled for stakeholder engagement. Other stakeholder engagements will also be detailed in this report.

OBAE was faced with four main challenges during this performance period. As a newly formed office, OBAE struggled with having enough application reviewers. To address this, OBAE requested assistance from other State agencies to join the review team, which was successful. Related to the staffing challenge and the lack of our own general counsel at the time, we required the use of another agency's legal counsel as well as contracted counsel to generate program-specific award agreements, in addition to their own workloads/already budgeted contract hours. This caused a delay in getting award agreements to our awarded sub-recipients. A draft agreement has been successfully vetted, and award agreements were issued in Q2 2023 to all sub-recipients. Since then, we have hired our own general counsel to expedite this process. In order to further support our awarded projects, we have also hired three regional project managers to oversee the projects and act as a liaison between the subrecipient and OBAE; the goal is to be staffed up to six project managers by the end of the year. Lastly, we had our state legislative session, which was a total of sixty days at the beginning of the year. Six of the seven legislative bills we brought forward were passed successfully, and this legislation is detailed on our webpage, referenced in the proceeding sections. Lastly, challenges to awarded projects were issued after the awards were announced; this caused some delays in the official agreements being issued - a challenge we are still currently addressing.

#### Uses of Funds

OBAE aims to achieve the following measurable goals: 100% of New Mexicans should have the opportunity to adopt the Internet by 2026. 100% of New Mexican residents and businesses should have access to terrestrial-based high-speed broadband networks that reliably deliver at least 100/20 Mbps by 2029 and at least be scalable to 100/100 Mbps to all broadband service areas. OBAE also has goals revolving around next-generation statewide networks (Statewide Education Network (SEN), Prison Education Network (PEN), 5G mobile networks) and program stewardship (transparency and

accountability). Key performance indicators (KPIs) will be included in plan developments as described in Promoting Equitable Outcomes section.

For the purposes of this Pilot Program, an eligible service area is defined as an area in which 80% of the household and business locations in the applicant's project area are either unserved and/or underserved. An unserved household or business lacks access to a wireline-based broadband connection offering at least 25/3 Mbps. An underserved household or business has access to a wireline-based broadband connection offering at least 25/3 Mbps but less than 100/20 Mbps. Each application will go through a rigorous scoring system around the applicant's network purpose (last mile, middle mile, etc.), service status (underserved, unserved), and technology type (fiber, cable, fixed wireless, etc.) under the following weighted conditions: project impact, community engagement, economic efficiency, project readiness, organization qualifications, marketing and services strategy, adoption assistance programs, and project sustainability. Geographic region is also considered to ensure all targeted populations and locations are adequately reached with the funding.

The Pilot Program is designed to build out fully scalable fiber networks, both last-mile networks extending access to the premise and middle-mile networks increasing capacity to unserved and underserved areas throughout the state. In certain cases, the program will cover wireless towers and related equipment.

To date, OBAE has awarded applicants from two of the three waves initiated under this NOFO; the third wave is still in the scoring phase and is estimated to be completed by August 2023. The table below summarizes the applications received and awarded from each wave.

**Application Cutoff Total Awarded Funding** Wave Total Applications | Total Awards Date (excluding match) 1 September 23, 2022 16 5 \$37,243,324.00 2 December 9, 2022 12 3 \$12,194,196.26 April 3, 2023 3 28 N/A (scoring) N/A (scoring) **Initial Funding** \$117,000,000.00 Remaining Funding \$67.562.479.74

Table 1: Connect New Mexico Pilot Program NOFO Application Summary

Following the scoring of the third wave, a fourth wave may be held, contingent upon the amount of funds unallocated.

Founding/governing legislation, current subrecipients, recent announcements, the program NOFO and guiding information, eligible entities, templates, scoring rubric, interactive broadband map of unserved/underserved locations, FAQs, Application Intake Portal, and other explanatory information regarding the Pilot Program can be found here:

https://www.doit.nm.gov/programs/broadband/connect-new-mexico-pilot-program/

Community actions; events (including key yearly events); OBAE's mission, goals, and objectives;

news/highlights, and compliance reporting guidelines (including this annual report) can be found on the Connect New Mexico webpage here:

# https://connect.nm.gov/

# Project Plan Summary

Six awards have been signed and executed with five subrecipients. Two projects are still in the due diligence phase to address potential overlap and finalize project details before an award agreement can be signed; these projects have been selected but need to be adjusted. The subrecipients all had award agreements executed in May/June 2023, so this initial report reflects the very early stages of project kickoffs. All applicants to date have only begun expensing out engineering service and fees regarding the Pilot Program application.

# Promoting Equitable Outcomes

New Mexico was recently allocated just over \$675 million for Broadband Equity, Access, and Development (BEAD) funding from the Infrastructure Investment and Jobs Act (IIJA) in the federal "Internet for All" broadband campaign. We also have just under \$750 thousand for planning purposes for the State Digital Equity Planning Grant (DE). With a contractor, CTC Energy, we are currently developing these plans which will provide much more detail on New Mexico's goals for equitable broadband access for all New Mexicans and will be elaborated on in future annual reports. Furthermore, the State of New Mexico has also invested \$100 million to be used towards broadband infrastructure through the Connect New Mexico Council Fund. A NOFO and grantmaking will start in late Summer or Fall 2023.

Just over 225 community engagements have occurred between August 2022 and June 2023, targeting the following covered populations, as denoted in DE:

- Aging individuals
- Incarcerated Individuals
- Veterans
- Individuals with disabilities
- Individuals with a language barrier
- Individuals who are members of a racial or ethnic minority group
- Individuals who primarily reside in a rural area

All six of our State districts had regional community events held; details for these events can be found on the Connect New Mexico webpage detailed in the previous section. Further activities planned include one-on-one meetings with the OBAE office, internet service providers (ISPs), and tribal consultations to address direct community needs, phone and web surveys, and other interviews with communities. While these are directly related to the work under BEAD and DE, the missions, goals, and objectives of OBAE for BEAD, DE, and CPF are all in alignment: these are three different but closely related vehicles to achieve broadband equity, access, and adoption across the state.

#### Labor

At this stage and with the current subrecipients, all have stated the intent to comply with Davis-Bacon Act regulations regarding prevailing wages. The below information was included in the submitted Program Plan. The following sections are from our NOFO regarding labor standards:

"Grantee may provide a certification that, for the relevant project, all laborers and mechanics employed by contractors and subcontractors in the performance of such project are paid wages at rates not less than those prevailing, as determined by the U.S. Secretary of Labor in accordance with subchapter IV of chapter 31 of title 40, United States Code (commonly known as the "Davis-Bacon Act"), for the corresponding classes of laborers and mechanics employed on projects of a character similar to the contract work in the civil subdivision of the State in which the work is to be performed, or by the appropriate State entity pursuant to a corollary State prevailing-wage-in-construction law (commonly known as "baby Davis-Bacon Acts"). If such certification is not provided, Grantee must provide project employment and local impact report detailing the following. The grantee must maintain sufficient records to substantiate this information upon request:

- The number of employees of contractors and subcontractors working on the project
- The number of employees on the project hired directly and hired through a third party
- The wages and benefits of workers on the project by classification
- Whether those wages are at rates less than those prevailing (as determined by Davis-Bacon Act)

Grantee may provide a certification that a project includes a project labor agreement, meaning a pre-hire collective bargaining agreement consistent with section 8(f) of the National Labor Relations Act (29 U.S.C. 158(f)). If the Grantee does not provide such certification, it must provide a project workforce continuity plan, detailing:

- How the Grantee will ensure the project has ready access to a sufficient supply of appropriately skilled and unskilled labor to provide high-quality construction throughout the life of project;
- How the Grantee will minimize risks of labor disputes and disruptions that would jeopardize timeliness and cost-effectiveness of the project;
- How the Grantee will provide a safe and healthy workplace that avoids delays and costs associated with workplace illnesses, injuries, and fatalities;
- Whether workers on the project will receive wages and benefits that will secure an appropriately skilled workforce in the context of the local or regional labor market; and
- Whether the project has completed a project labor agreement.
- Whether the project prioritizes local hires.
- Whether the project has a Community Benefit Agreement, with a description of any such agreement."

# Community Engagement

The Promoting Equitable Outcomes section covered the narrative portion of this section. A table summarizing the engagement that has occurred during this performance period is attached at the end of this report.

The following is a list of planned activities to be conducted over the next reporting period, both with and without the help of contracted support: regional meetings, listening sessions, interviews, webinar series, phone surveys, stakeholder inventory, and asset inventory. We do not have this fully detailed at this time with specifics, as the plans are still in development and will be completed during the next reporting period. This will be carried out alongside efforts by the ISPs for outreach, such as increasing enrollment in the Affordable Connectivity Program (ACP). Some local nonprofits are already engaging in ACP outreach; we are exploring partnership opportunities to support these efforts. Some New Mexico communities have also received ACP outreach grants.

Project Managers are reaching out to stakeholders in their assigned communities to be proactive in addressing needs, sharing resources, and identifying assets. Stakeholders are being reached through cold calling, emails, and webinar invites. The communication is being tracked and action items are distributed according to the expertise.

We aim to make this and all future reports available on our website in both English and Spanish languages by next reporting period; we aim to investigate other local languages and accessibility options as well. We will upload this report as soon as this process is established.

Meeting with FCC Chairwoman Jessica Roswenworcel and FCC Counsel Priscilla				Federal Communications								This area is very populous and highly engaged, and reported out in strong numbers. Talking points for FCC leadership discussion  To summarize, getting the maps right is fundamental to success of BEAD.  Broadband Equity, Access, and Deployment, requires a fair approach to the data used in funding the states. By not allowing enough time for accurate maps, the BEAD Program will perpetuate the historical inequities New Mexico and other states have faced and ultimately will fail the purpose of the BEAD Program.

Group

After the email survey sent 2/23/2023 received little to no response from members, a telephone survey of some randomly selected members to try to gain more data directly in a manner more conducive to this covered population group. Agenda: New Mexico Broadband Director Kelly Schlegel and National Telecommunications and Information Administration (NTIA) Senior Advisor Barbara Cottam will discuss the anticipated impact of federal Broadband Equity, Access and Deployment (BEAD) funding in local communities throughout New Mexico. The state recently receiving \$5,740,534.91 in funding from the Bipartisan Infrastructure Law, signed by President Biden, to plan for the deployment and adoption of affordable, equitable,

and reliable high-speed Internet service throughout the state.

			The Bull Ring (150 Washington	New Mexico Exchange Carrier								broadband internet service to customers in rural areas of New Mexico. Our Annual Meeting brings together the CEOs or managers from the ten companies that make up the NMECG.

Govt principals speak from podium

Audience Q&A

12:00-12:30pm – Press Gaggle (TBC)

12:30-12:45pm – Transition to departure

You are invited to join USDA Secretary Tom Vilsack and the New Mexico Congressional Delegation on Monday, April 3 in Albuquerque, NM. You are invited to participate in a closed-press stakeholder meeting with the delegation to discuss the importance of broadband and similar infrastructure investments to your community's growth and economic development. Following the meeting, you will be invited to attend as an audience member for an open-press panel.

USDA Secretary Tom Vilsack will join U.S. Senator Martin Heinrich, U.S. Senator Ben Ray Luján and U.S. Representatives Teresa Leger Fernández, Melanie Stansbury, and Gabe Vasquez will announce significant investments in New Mexico by the Biden-Harris Administration to expand access to high-speed broadband internet for individuals, farms, and businesses in rural areas across the state. The announcement reflects the goals of President Biden's Investing in America agenda to rebuild our economy from the middle-out and bottom-up through investments such as the Bipartisan Infrastructure Law, which provides \$65 billion to expand reliable, affordable, high-speed internet to all communities across the United States.

State Broadband Leaders Workshop:	5/8/2023	Meeting/Presentation	Virtual	Community Stakeholders	Statewide Engagement	all counties	~35			Meeting BEAD Workforce Development Requirements
Meeting with Mitch Hibbard, PVT	5/8/2023	Meeting/Presentation	4011 W Main Artesia, NM 8821	,	Local	ISPs	3	3	X	Met with Mitch and he took us around their headquarters building. He also introduced us to lots of the staff who were there. The final room on our tour was the auditorium, which PVT has offered to us free of charge for any broadband meeting. They really want to host a regional meeting there.
Meeting with Ron Allen, Carlsbad Municipal Schools Director of Technology	5/8/2023	Meeting/Presentation	101 N Halagueno St, Carlsbad, NM 88220	Community Stakeholders	Local	Schools and Eddy County	3		X	Ron gave us tour of the area where he and his team are moving to, including their new data center. The three of us talked about his current and future projects. He appreciated the funding Carlsbad has received in the past from PSCOC, and will work with us to ensure E-rate/state funding is utilized for the future projects. We will all keep the communication lines open.  While looking at the new data center, Ron showed us three self-contained cabinets. With their own cooling system, each cabinet requires little to no HVAC in the room. That means the emergency generator can be sized much smaller than in most data centers — not needing to pick up the HVAC load eliminates most of the electric power requirement. The smaller generator saves capital expense while the lowered cost to cool each cabinet (rather than the entire room) lowers operating expenses. The ROI looks like it's good but will take a closer look.
Carlsbad meeting with Oil & Gas Industry	5/8/2023	Meeting/Presentation	In person	Community Stakeholders	local	Eddy Count and ISPs	10+			People from Exxon Mobil, Devon Energy, Carlsbad City Council, Economic Development, Southeast New Mexico College, WIPP, and PVT were there in person. The CEO of Permian Strategic Partners (PSP) Outcomes:Broadband is a 3-legged stool: availability, affordability, accessibility Helping locals fill out the ACP forms to apply for financial aid; issue of privacy with personal info so don't necessarily want to sign up High-Cost Areas – get 10% more funding and waive matching fee requirements Fiber to the home is the goal, but wireless is definitely part of the solution. Viability over time is certainly a variable in NM - implementation and maintenance costs, but also the dependability of the technology to sustain demand over time. Often fiber pays for itself over time because so dependable for 20 to 50-year lifecycle. Fiber overbuild on copper - can price ISP out of budget, such as NMSLO permits/ROW on implementation; OBAE working with SLO, DOT, federal agencies, tribes, etc.  PVT - national programmatic agreements initiative  Learn from others - ex. North Dakota - rural expansion  Importance of Workforce Development: study, training, apprenticeship, work WIPP offers apprenticeships  Southeast New Mexico College interested in doing training; expanding campus so now is the time to get this decided
Clearfield Demo Trailer at Tesuque Pueblo	15/9/2023	Meeting/Presentation	39 TP 804 Santa Fe, NM 87506	Trihes/ ISPs	Local	Tesuque Pueblo	~10-15		¥	Clearfield Product TrailerVisitTesuque Pueblo When we roll into your parking lot, we will unload a variety of outside plant cabinets –from our well-known PON cabinets to our latest small-footprint, powered cabinets. We're excited to share an additional learning opportunity for State and Territory broadband offices on a subject on which many of you have had questions — prevailing wage as it relates to NTIA's BIL programs. As you know, Eligible Entities are required to develop a workforce plan to achieve a diverse, skilled, and sufficient workforce for building and maintaining high-speed Internet infrastructure. One strategy for Eligible Entities to consider including in your plan is encouraging or requiring prevailing wage standards for subgrantees, and/or implementing provisions of the Davis-Bacon Act in your programs.

The Department of Labor (DOL) will be joining us on June 6 from 3-4pm ET to discuss prevailing wage and strategies for including and enforcing a prevailing wage requirement in your programs. We'll leave time at the end for DOL to answer your prevailing wage questions. Given the importance of the topic, this session will be held during an off-SBLN week so that ample time can be given for questions and will be recorded.

Tour or por and disseassion or partnership opproteining between object and pro-

- 1.Interruption of service during revenue generating windows.
- a.Define dates and create a calendar event to ensure services will not be affected. Gavin
- b. Bave a call three days prior with Lorenzo's team to discuss the window. Gavin,
- 2. Video Camera downloading of ZIP files.

 $\mathbf{x}$   $\mathbf{x}$   $\mathbf{x}$   $\mathbf{x}$   $\mathbf{x}$   $\mathbf{x}$ 

- a.Ping hosted video provider to determine if it is a bandwidth issue. Gavin to provide IP address and latency.
- b.Potentially set up a task to download files and store locally. (not as desirable).

  Possibly a priority, IP address problem or scheduling problem

  c.Action Gavin and Alex
- 3.Increase bandwidth comes with a cost. \$4100 for 1 gig and define critical damages or go with standard SLA.
- a. Sive visibility to carrier SLA's (especially for ethernet). -Alex
- b.DOIT writeup SLA for DGF (includes Lumen and DOIT piece) Peter.
  c.Determine ROI on \$4100. What is the cost of slower speeds. -Mike, Gavin, and

Larger Recommendation for DOIT and OBAE: All departments/agencies we talk to should have an inventory of services. They could prioritize those based on the ROI model for each department/agency. This should be conducted annually by the departments IT staff and validated by DOIT. Suggest quarterly meetings with DOIT's team and departments IT staff to review services. Doit might consider defining what its value-added services are this would greatly benefit their perception from each Department/Agency. They could explain how they add value by being a Managed x Service Provider, in addition to What do they do over their circuit like content
