Applicant Information

- State agency
- Unique Entity Identifier
- Agency Address
- Primary Contact Name
- Email
- Phone number

Project Information

- Provide the official title of the proposed project
- Provide a clear, concise overview of the project, including its primary purpose, major activities, and intended outcomes, and location of the proposed public wireless network.
- Describe why the project is needed. In your response, address:
    a. The critical need in the community the project is designed to address.
    b. How this need resulted from, was made apparent by, or was exacerbated by the COVID-19 public health emergency.
- Explain why this issue is important to address right now, and describe any urgency, time-sensitivity, or conditions in the community that make timely investment necessary
- Describe how the project qualifies as a capital project and explain how it will invest in capital assets designed to directly enable work, education, or health monitoring. (Examples may include facilities, broadband infrastructure, durable equipment, etc.)
- Describe how the devices and equipment installed by this funding will be managed, operated, and maintained for a minimum of five years.

Community Benefit/Community Summary

[Discuss details as to the benefits this project could offer the community.]

- What community, or communities, will this project serve?
- Individuals Served: Provide an estimated number of individuals that will be served, with any applicable supporting evidence.
    - Please include the resource/source links you are using to obtain the data on this application.
- How else will you positively impact the community?
